
Table of Contents

Chapter 1 Executive Summary	1-1
1.1 Background	1-1
1.2 Executive's Recommended I/I Control Program	1-3
1.3 Basis for the Recommendations.....	1-5
1.3.1 Process for Identifying Cost-Effective I/I Reduction Projects	1-5
1.3.2 Considerations Related to I/I Reduction and Control.....	1-6
1.4 Supporting Documents.....	1-7
Chapter 2 Background	2-1
2.1 How I/I Enters the Regional System.....	2-1
2.2 Why I/I Control Is Important	2-3
2.2.1 Increased Capital and Operating Costs.....	2-3
2.2.2 Federal Regulations.....	2-5
2.2.3 State Regulations.....	2-6
2.2.4 King County Code.....	2-6
2.2.5 I/I Provisions in Local Agency Agreements.....	2-7
2.2.6 I/I Reduction Programs in Other Agencies	2-8
2.3 King County's I/I Control Program	2-9
2.3.1 Policy Direction for I/I Control	2-9
2.3.2 Implementation of the Policies	2-11
2.3.3 Consensus-Based Approach	2-12
2.4 Contents of this Report	2-13
Chapter 3 Assessing I/I Levels and Reduction Technologies	3-1
3.1 Flow Monitoring	3-1
3.1.1 Flow Monitoring Approach.....	3-1
3.1.2 Flow Monitoring Results.....	3-3
3.2 Flow Modeling.....	3-3
3.2.1 Flow Modeling Approach.....	3-3
3.2.2 Flow Modeling Results: I/I Flow Projections	3-4
3.3 I/I Reduction Analysis	3-7
3.3.1 National I/I Program Review.....	3-7
3.3.2 Pilot I/I Reduction Projects	3-9
Chapter 4 Benefit-Cost Analysis	4-1
4.1 Benefit-Cost Analysis Approach	4-1
4.2 Conveyance Projects Identified in the Regional Needs Assessment	4-2
4.2.1 CSI Projects.....	4-3
4.2.2 Comparison with CSI Projects Identified in the Updated RWSP.....	4-3
4.2.3 Locations of CSI Projects in Relation to I/I Flows in Mini Basins	4-7
4.3 Assumptions Used in the Analysis.....	4-7
4.3.1 Planning Assumptions for the I/I Control Program.....	4-7
4.3.2 Assumptions for Estimating Capital Costs of CSI Projects	4-10
4.3.3 Assumptions for I/I Reduction	4-11
4.3.4 Assumptions for Unit Costs of I/I Reduction Techniques.....	4-12
4.4 Definition of Cost-Effectiveness.....	4-12

Table of Contents

4.5	Monitoring, Modeling, and Pilot Project Data.....	4-13
4.6	Benefit-Cost Analysis Results	4-15
4.7	Sensitivity Analysis Results.....	4-17
Chapter 5	I/I Control Program Recommendation.....	5-1
5.1	Overview of Recommendations.....	5-1
5.2	Discussion of I/I Reduction Recommendations	5-3
5.2.1	Selecting, Implementing, and Evaluating Initial I/I Reduction Projects	5-3
5.2.2	Applying Planning Assumptions	5-5
5.2.3	Defining and Evaluating Cost-Effectiveness.....	5-5
5.2.4	Funding I/I Reduction Projects.....	5-6
5.2.5	Implementing I/I Reduction Projects on Private Property.....	5-7
5.3	Discussion of Long-Term I/I Control Recommendations.....	5-10
5.3.1	Local Development Regulations for I/I Control.....	5-11
5.3.2	Standards, Guidelines, Procedures, and Policies	5-12
5.3.3	Flow Audit of Regional and Local Systems.....	5-13
5.3.4	Whether to Implement an I/I Surcharge	5-13
5.4	Discussion of Program Administration and Policy Recommendations	5-14

List of Tables

Table 3-1.	Agencies Surveyed for I/I Reduction Programs	3-7
Table 3-2.	Rehabilitation in Local Sewers.....	3-11
Table 3-3.	Summary of I/I Pilot Project Results.....	3-13
Table 4-1.	Conveyance System Improvement Projects Identified in the Regional Needs Assessment....	4-4
Table 4-2.	Planning Assumptions for the I/I Control Program	4-9
Table 4-3.	Conveyance Facility Construction and Allied Cost Assumptions.....	4-10
Table 4-4.	I/I Reduction Assumptions	4-11
Table 4-5.	Unit Costs Assumptions for I/I Reduction.....	4-12
Table 4-6.	Cost-Effective I/I Reduction Projects	4-16
Table 4-7.	Sensitivity Analysis Using the Initial Assumptions for I/I Reduction.....	4-18
Table 4-8.	Comparison of Benefit-Cost and Sensitivity Analyses Results.....	4-18

List of Figures

Figure 1-1.	Local Wastewater Agencies Within King County Wastewater Service Area	1-2
Figure 2-1.	Combined Sewer System and Separated Sewer System	2-1
Figure 2-2.	Sources of Infiltration and Inflow	2-2
Figure 2-3.	Impacts of Peak I/I on Wastewater Flows.....	2-4
Figure 2-4.	I/I Control Program Elements and Schedule	2-11
Figure 3-1.	Flow Meter Locations	3-2
Figure 3-2.	Peak Flow Projections for Model Basins	3-5
Figure 3-3.	Peak Flow Projections for Mini Basins	3-6
Figure 3-4.	Pilot Project Locations	3-10
Figure 4-1.	Conveyance System Improvement Project Locations	4-6

Appendices

Appendix A – Selected Legal Authorities Related to Implementing and Funding an Infiltration and Inflow Reduction Program

Appendix B – Final Draft Standards, Guidelines, Procedures, and Policies

Supporting Documents (available on CD in the back of report)

2000/2001 Wet Weather Flow Monitoring Technical Memorandum (May 2001)

2001/2002 Wet Weather Flow Monitoring Technical Memorandum (June 2002)

Pilot Project Report (October 2004)

Alternatives/Options Report (March 2005)

Regional Needs Assessment Report (March 2005)

Benefit/Cost Analysis Report (November 2005)
